Summary:

I am a frontend web developer looking for an opportunity to work with talented developers. I am a self motivated learner and I find it fulfilling whenever I am able to solve complex problems.

Technical Skills:

HTML, CSS, Javascript, jQuery, AJAX, GitHub, Visual Studio Code, npm, Chrome DevTools

Projects:

Connected Politics <https://anusontarangkul.github.io/connected-politics/>

- Created a website application with a minimalistic design to promote political involvement using HTML, CSS, Javascript and jQuery.
- Performed the jQuery Ajax function using APIs from Google and ProPublica to dynamically display elected officials and upcoming bills based on the address the user entered.
- Integrated Twitter Developer tools to allow users to tweet about an upcoming bill and auto-populated the tweet with the URL of the bill.

Weather Dashboard <https://anusontarangkul.github.io/weather-dashboard/>

- Created a website application to help users find the weather by entering a city using HTML, CSS, Javascript, and jQuery.
- Performed the jQuery Ajax function from the OpenWeatherMap API to find weather based on the searched city and dynamically appending the information to the HTML and CSS using Javascript.
- Customized the user experience by saving their searched city to the local storage for convenient accesses of previous cities.

Work Experience:

Promoter, Wynn Las Vegas (*June 2018 - March 2020*)

- Utilized digital marketing such as informational videos and reviews to generate leads.

Ecommerce Graphic T-shirt, Business Owner (*July 2016 - June 2018*)

- Designed a shopify website and optimized sales on Amazon using Search Engine Optimization.

Securities Compliance Accountant II, DAC Bond (*June 2015 - July 2016*)

- Analyzed financial statements of municipal bonds for SEC compliance.

Education:

University of California, Berkeley: MERN Full Stack Coding Bootcamp (*2020*)

University of Florida: Master in International Business (*2015*)

University of Florida: Bachelor of Science in Finance (*2014*)
